

IDEA9106 Semester 1 2026
A2a. Team Agreement

Group name	RhodesReg
Tutorial number	Tutorial 23
Indicate how/when the group has agreed to communicate outside of tutorial time	We have agreed to communicate through a WeChat group and respond to messages within 24 hours. Urgent matters will be discussed through group calls.
Indicate how/when the group has agreed to work together on the semester-long project outside of tutorial time	We have agreed to meet online or in person at least once a week to discuss our progress, allocate tasks and work collaboratively on the semester-long project. Additional meetings will be arranged when needed.

Team member name	Wenxi Ma
SID	550652094
Strengths	Research, communication, critical thinking and project coordination
Weaknesses	Limited experience with design prototyping and a tendency to spend too much time refining details
Background/Expertise I bring to the group	A background in computer science, research and data analysis, with experience across technology, education and business-related projects
Factors that could negatively impact my contribution to the group	Other coursework and research commitments may occasionally limit my availability. I may also spend too much time refining details.
Indicate how your group has agreed to mitigate these negative impacts	We will set clear deadlines, divide tasks according to each member's strengths and regularly update one another on our progress. I will communicate any scheduling conflicts early and ask for support when needed.

Team member name	Ruifen Zheng
SID	540776441
Strengths	Mathematical thinking, problem-solving, coding and data analysis
Weaknesses	Limited experience in design and visual prototyping
Background/ Expertise I bring to the group	A strong background in mathematics and computer science, with experience in programming, logical analysis and technical problem-solving

Factors that could negatively impact my contribution to the group	My capstone project may occasionally limit the time I can dedicate to this project.
Indicate how your group has agreed to mitigate these negative impacts	We will plan tasks and deadlines in advance, divide the workload according to each member's availability and strengths, and communicate early if scheduling conflicts arise.

Team member name	Anda Hao
SID	540872813
Strengths	Product management, problem-solving, communication and rapid prototyping
Weaknesses	Limited experience with formal design methods and visual design
Background/ Expertise I bring to the group	A background in product management and coding, with experience in defining user needs, coordinating projects and rapidly building functional prototypes through vibe coding
Factors that could negatively impact my contribution to the group	I may focus too quickly on building a solution before fully exploring the problem and considering different design possibilities.
Indicate how your group has agreed to mitigate these negative impacts	The group will complete the research and ideation stages before choosing a solution. We will regularly review prototypes together and use feedback to guide further development.

Team member name	Zeyu Li
SID	530761196
Strengths	Urban planning, spatial thinking, research and problem analysis
Weaknesses	Limited coding and technical prototyping experience
Background/ Expertise I bring to the group	A background in urban planning, with experience in understanding public spaces, human behaviour, community needs and service accessibility
Factors that could negatively impact my contribution to the group	Commitments from other courses may occasionally limit the time and energy I can dedicate to this project.
Indicate how your group has agreed to mitigate these negative impacts	We will plan tasks and deadlines in advance, distribute the workload according to each member's availability and strengths, and communicate early about any scheduling conflicts.

AI acknowledgement	<i>We have not used generative AI in this submission</i>
---------------------------	--

By submitting this team agreement, we acknowledge that we have met and discussed:

- this team agreement
- how/when we will communicate outside of tutorial time

- how/when we will work together on the Major Project outside of tutorial time
- individual and collective strengths
- individual and collective weaknesses
- individual and collective background/expertise
- individual and collective factors that could negatively impact contributions to the group
- ways of mitigating negative impacts
