

IDEA9106 Design Thinking

Semester 2 2026

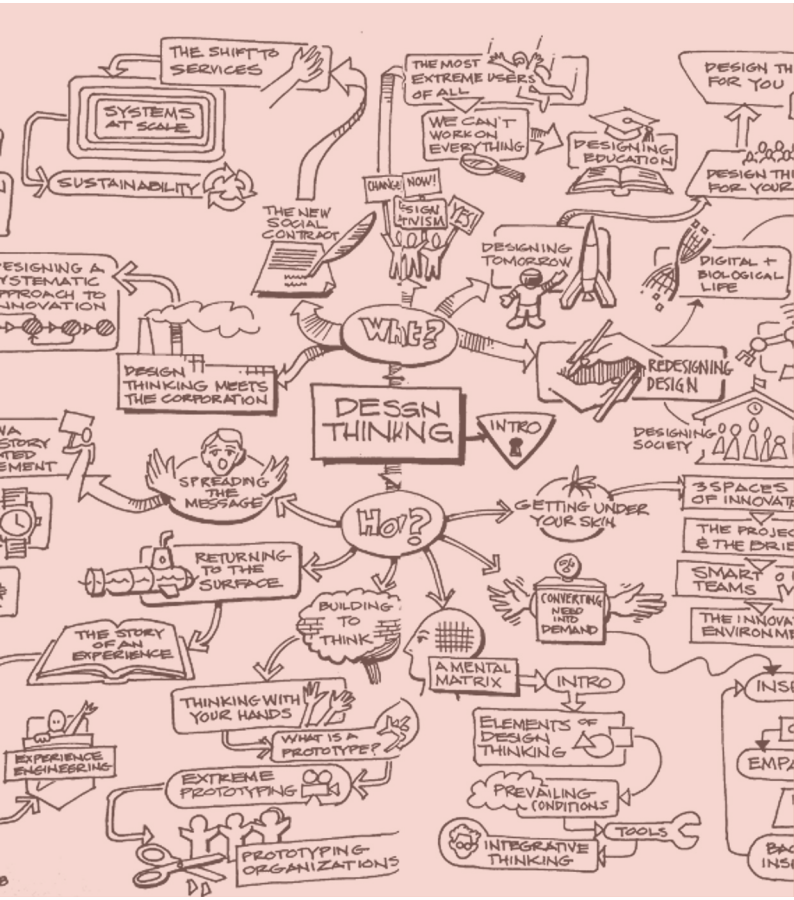

THE UNIVERSITY OF
SYDNEY

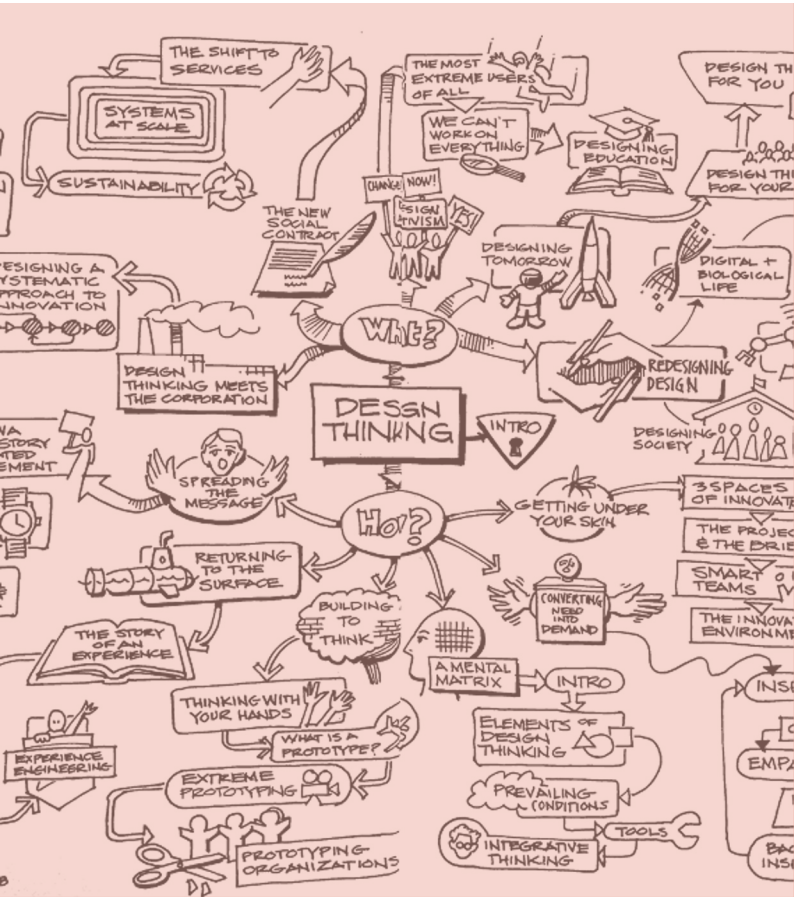

We recognise and pay respect to the Elders and communities - past and present - of the lands upon which this University of Sydney campus sits. Indigenous knowledge has been generated and shared for thousands of years, underpinned by a strong connection to land, sea and culture.

We seek to continue to exchange knowledge and build connections upon these traditions.

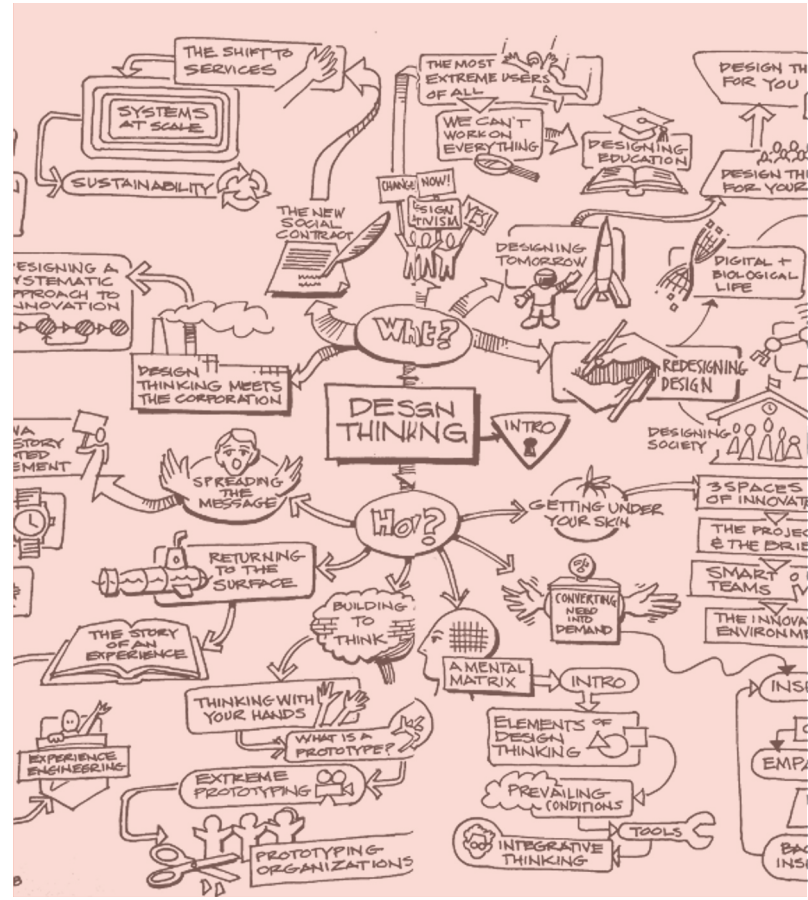

Stand up talk to

Tutorial Aim

This tutorial will start the Discovery stage of the semester-long project through the creation of a visualisation of secondary research, a Stakeholder map and a Power map

- Visualising research using sketchnoting
- Stakeholder mapping
- Power mapping
- Sharing insights
- Wrap Up

Activity 1

Visualising research using sketchnoting

In this activity you will create a visualisation of your secondary research using the sketchnoting method

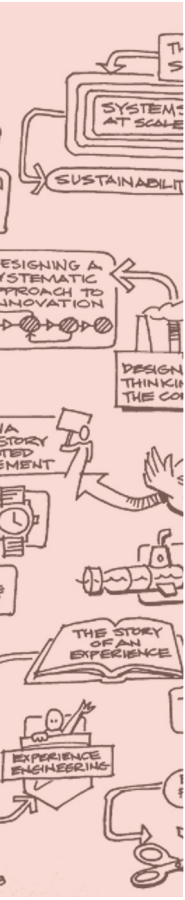

Sketchnoting

- Text in banners and frames
- Use arrows to connect ideas
- Use fonts, colours and shading to highlight information
- Use icons to help visualise ideas
- There is no wrong way!
- Anyone can sketchnote!
- See Week 2 resources for extra assistance

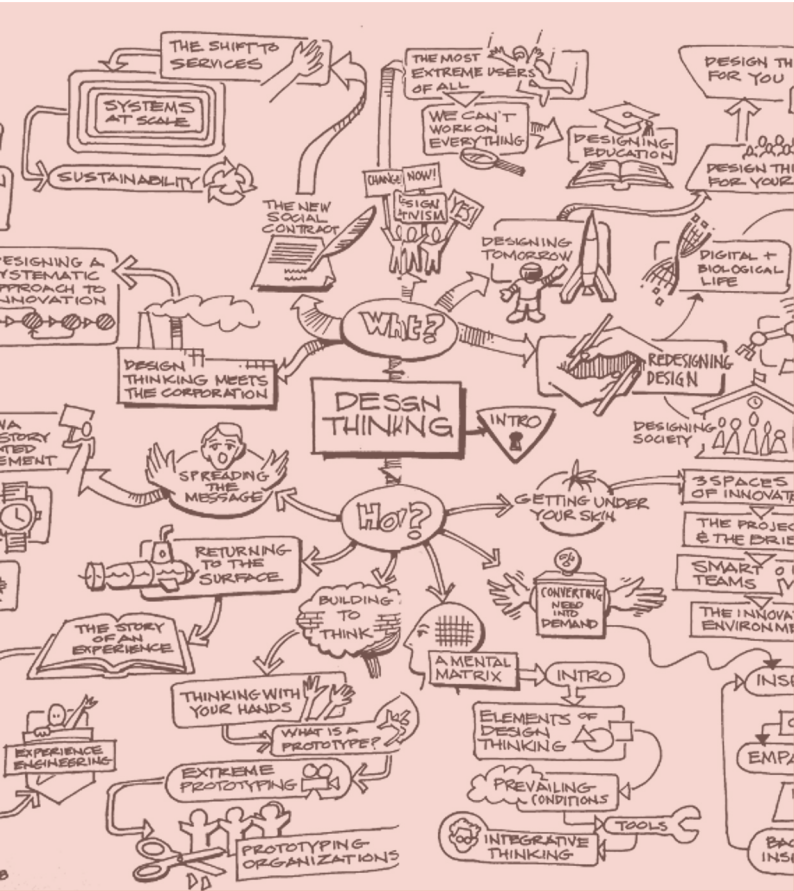

What do I visualise?

- What findings have you found from secondary research?
- Who/what is affected by waiting?
- What are some of the macro, meso and micro effects of digital, interactive public art?
- Are there connections between the findings?

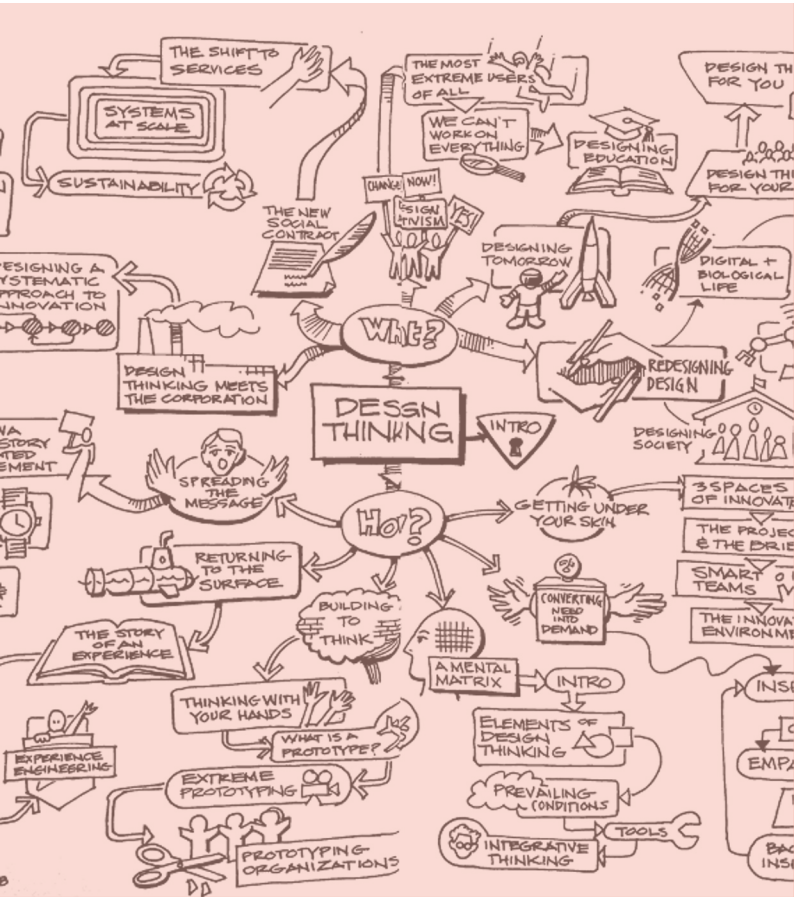

Now consider ...

- Where are the gaps in the research? eg. where and why people wait, how long, what they are told, who decides the order, who else is affected, etc.
- Make a list of the areas you need to research more
- Show the connections between findings by drawing lines between the insights
- Establish a hierarchy of visual information by using sketchnoting techniques such as size, colour, position, banners etc.
- What needs to be finished before inclusion in the A3. submission?

Pair reflection

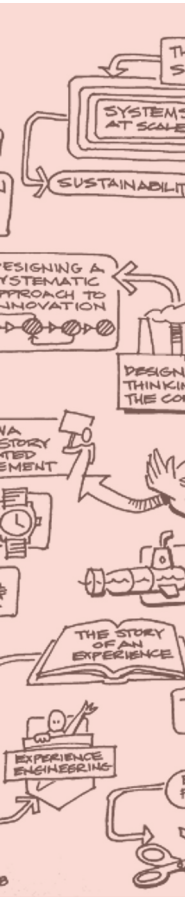

- Share a finding from your research.
- Why was this finding interesting or surprising?
- Share one gap in your knowledge
- Why is it important to find out more about this gap in your knowledge?

Activity 2

Stakeholder mapping

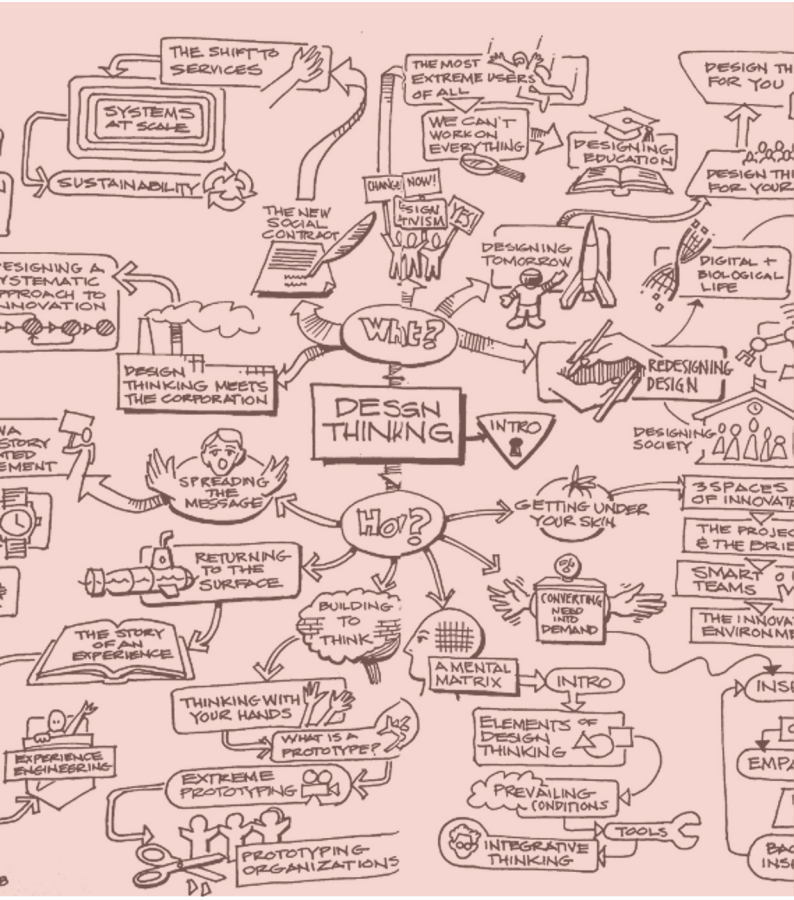

In this activity you will consider who/what are the stakeholders in the design brief

What do I map?

- Read through the project brief
- Who/what might be the stakeholders in the brief?
- Using the template on Figma or Canvas, write each stakeholder on a post-it and position them on the stakeholder template
- Identify if the stakeholder is a partner, primary or secondary stakeholder

**You will need to finish this map
and include it in your A3 submission.**

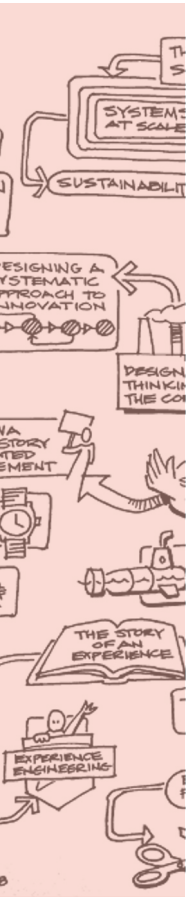

Activity 3

Power mapping

In this activity you will consider the role of stakeholders in relation to power, by answering the following question:

Who/what has interest, and who/what has influence, over how long people wait and who waits longest?

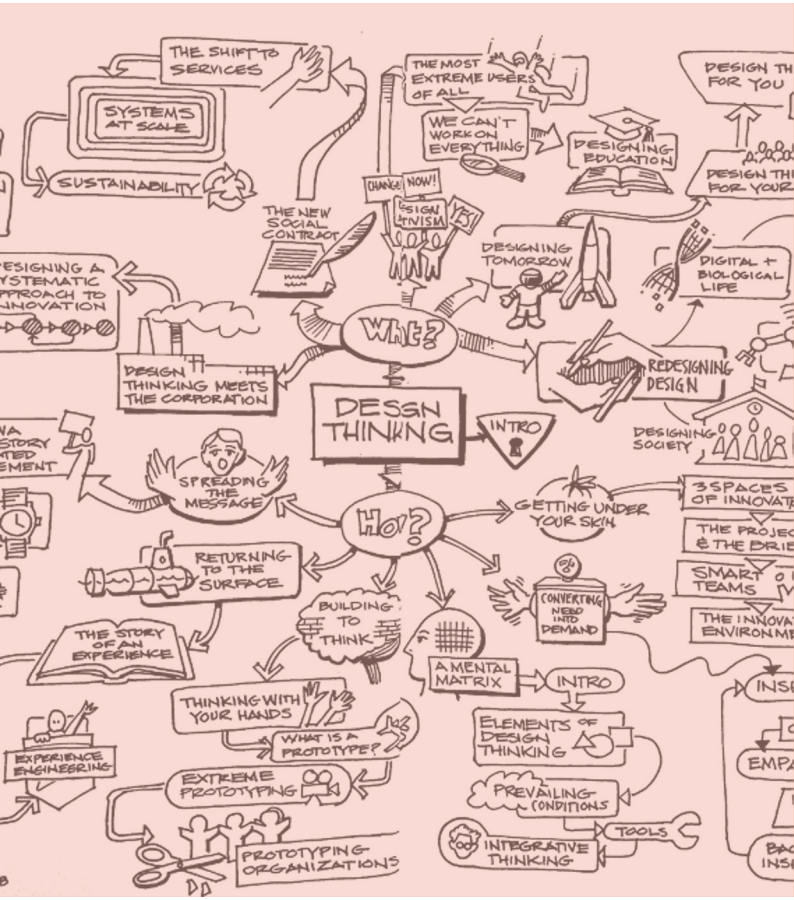

Activity 4

What do I map?

- Who/what might have interest or influence in the waiting situation you have been researching? Consider those who wait, those who manage the wait, and those who never have to wait at all.
- Who/what decides how long the wait is, who is told about it, and who goes first?
- Using the template on Figma or Canvas, map all the stakeholders from the previous activity onto the power matrix.

**You will need to finish this map
and include it in your A3 submission.**

- Share a finding from the stakeholder and power mapping.
- Why was this finding interesting or surprising?
- Share one stakeholder that has the power to change the wait, including what they could change and how much power they have..

Wrap Up

- Any questions regarding today's activities?

Before next week

- continue to build your secondary research
- do the prework in the Week 3 Canvas module
- find students you would like to form a project group with
- complete today's activities for inclusion in A3.

SEE YOU NEXT WEEK!
