We recognise and pay respect to the Elders and communities - past and present - of the lands upon which this University of Sydney campus sits. Indigenous knowledge has been generated and shared for thousands of years, underpinned by a strong connection to land, sea and culture. We seek to continue to exchange knowledge and build connections upon these traditions.

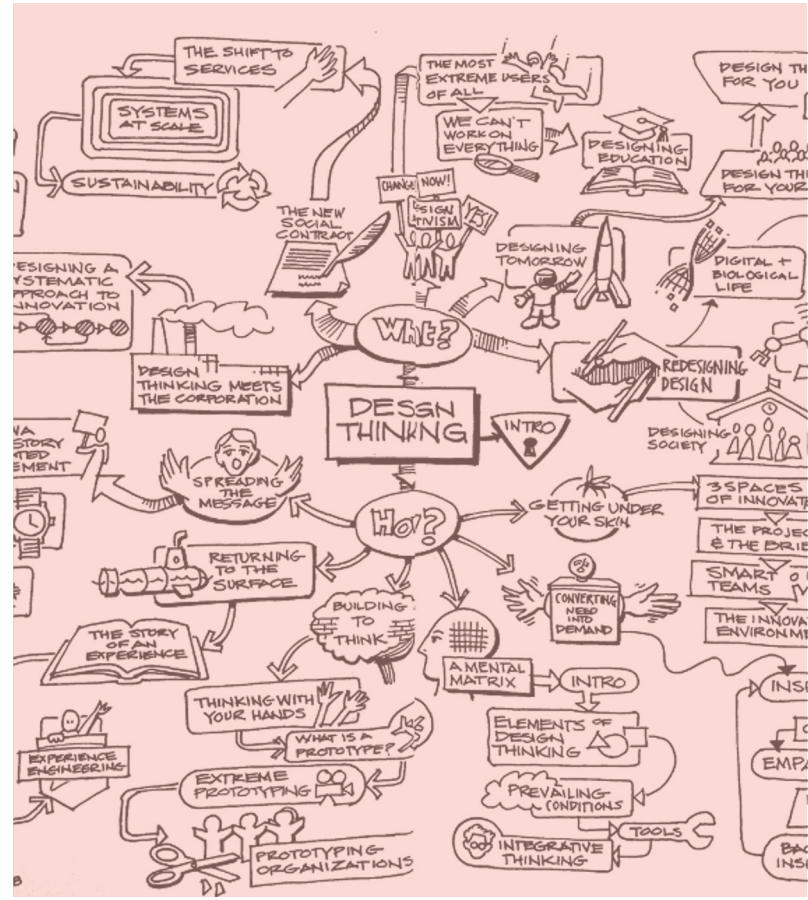

Tutorial Aim

In this tutorial students will:

- Demonstrate extracting data from your interview transcripts
- evaluate interview data individually using affinity diagramming
- evaluate interview data collectively using affinity diagramming

- **Extracting data from transcripts - sample**
- Affinity Diagrams Individual
- Affinity Diagrams Collective
- Wrap Up

What can you extract from this sample excerpt?

Transcript (1)

So, those cases that you'd spontaneously go for like one night's dinner, that's obviously when you haven't planned, is that right? Or you've run out of these Youfoodz or ...?

Yeah, basically. Or I'm having more than just myself at home. 'Cause I only see those Youfoodz as convenient and cost-effective if it's just for yourself. But if it's for more than one then you might as well use another company where you actually cook the food, or you should just go to Coles and then cook.

So, those cases that you'd spontaneously go for like one night's dinner, that's obviously when you haven't planned, is that right? Or you've run out of these Youfoodz or ...?

Yeah, basically. Or I'm having more than just myself at home. 'Cause I only see those Youfoodz as convenient and cost-effective if it's just for yourself. But if it's for more than one then you might as well use another company where you actually cook the food, or you should just go to Coles and then cook,

What can you extract from this sample excerpt?

They use food delivery / Youfoods

Sometimes they have guests

They live by themselves.

They might eat alone or with others

"actual" food is home cooked.

Cost and convenience are factors

They shop groceries from Coles

Confident cook

What can you extract from this sample excerpt?

They use food delivery / Youfoods

Sometimes they have guests

“actual” food is home cooked.

Confident cook

They shop groceries from Coles

Cost and convenience are factors

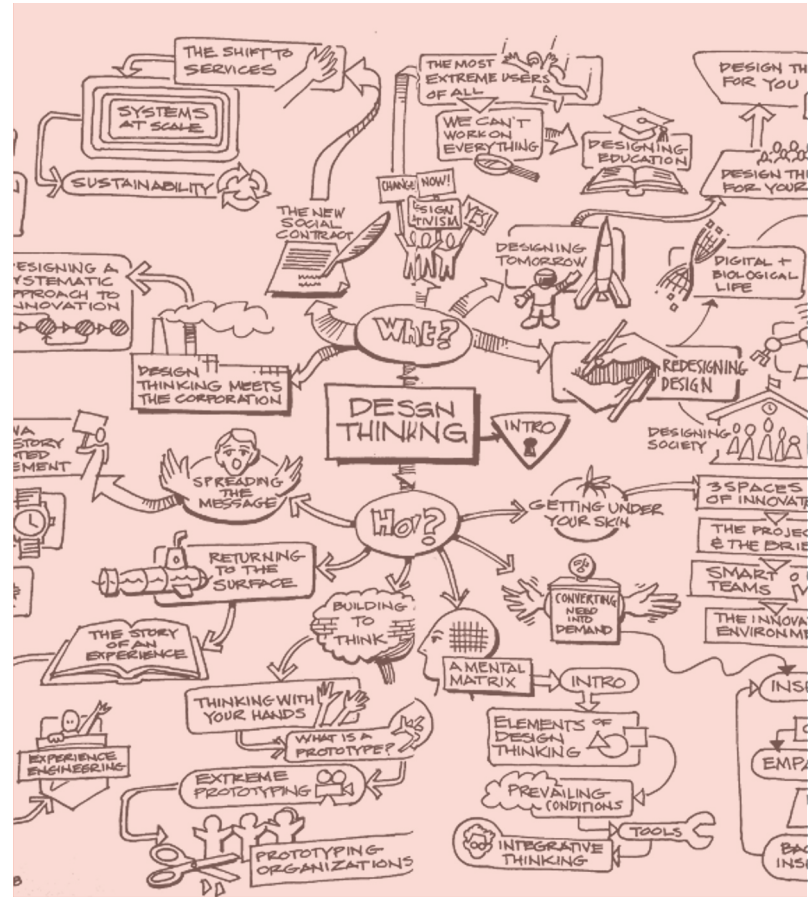

They live by themselves.

what you write on post-it notes.

They might eat alone or with others

- Extracting data from transcripts – sample
- **Affinity Diagrams Individual**
- Affinity Diagrams Collective
- Wrap Up

Part 1: Identify insights (10mins)

- Read through the transcripts
- Find insights that align with the interview questions and potential problem/opportunity space
- Write insights on a yellow post-it (these are known as affinity notes)
- Generate as many affinity notes as possible

Part 2: Grouping insights (10mins)

- Group the affinity notes into columns of related notes
- What patterns do you see forming?
- Are there patterns between/in the insights you have written?
- Rearrange the notes if they would go better with another group of notes
- 3 – 6 groups/columns of related affinity notes

Part 3: Identify needs & themes (10 mins)

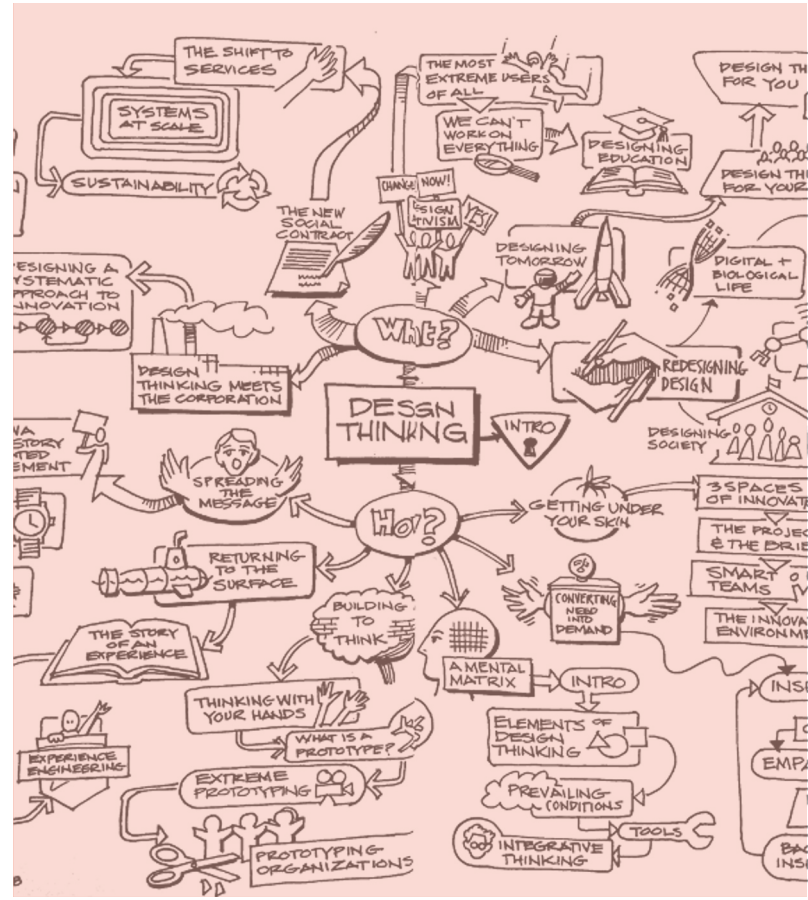

- Label each column of notes using a blue (or other colour) post-it
- Write a user/stakeholder need in first person ie. in the voice of a user/stakeholder
- Group blue notes if they have related themes
- Use the pink (or other colour) post-it to write a label for the grouped themes

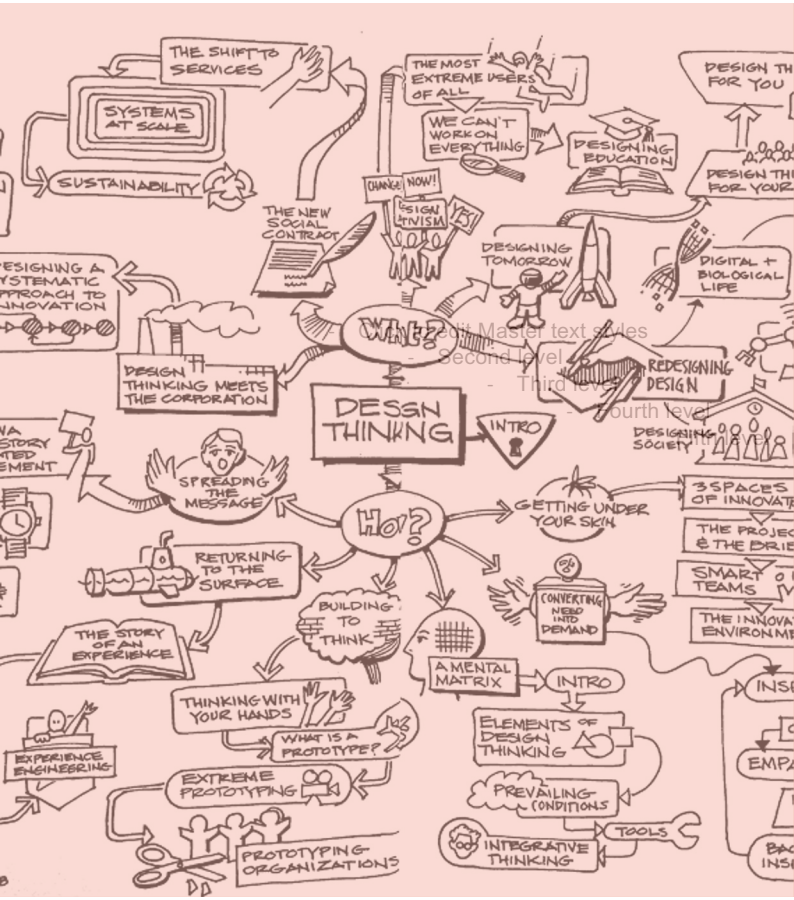

Part 4: Review & identify (10 mins)

- Review the affinity diagram
- Do any notes need to be moved or added to create a more powerful visualisation of user needs and insights?
- Use the green (or other colour) post-it to identify any ideas or potential solutions
- Write the idea on the green post-it and place it on the affinity note, need or theme, that sparked the idea
- Take a photo of the diagram

- Extracting data from transcripts – sample

- Wrap Up

Affinity Diagrams Collective

This activity asks students to analyse and evaluate their project group's combined interview data

Part 1: Identify insights (10mins)

- Read the affinity diagrams of your group members

Part 2: Group & discuss insights (20mins)

- Discuss the patterns forming in the collective data
- Discuss how these patterns might be grouped to represent the collective insights
- Rearrange the notes if they would go better with another group of notes
- 3 – 6 groups/columns of related affinity notes

Part 3: Identify needs & themes (10 mins)

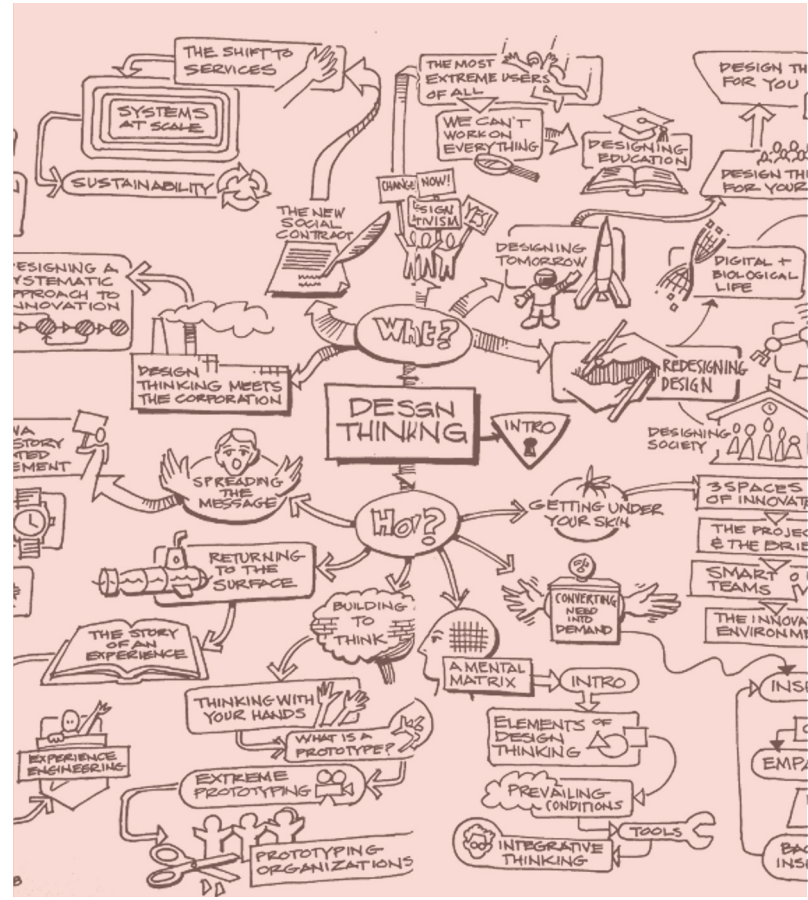

- Label each column of notes using a blue (or other colour) post-it
- Write a user/stakeholder need in first person ie. in the voice of a user/stakeholder
- Group blue notes if they have related themes
- Use the pink (or other colour) post-it to write a label for the grouped themes

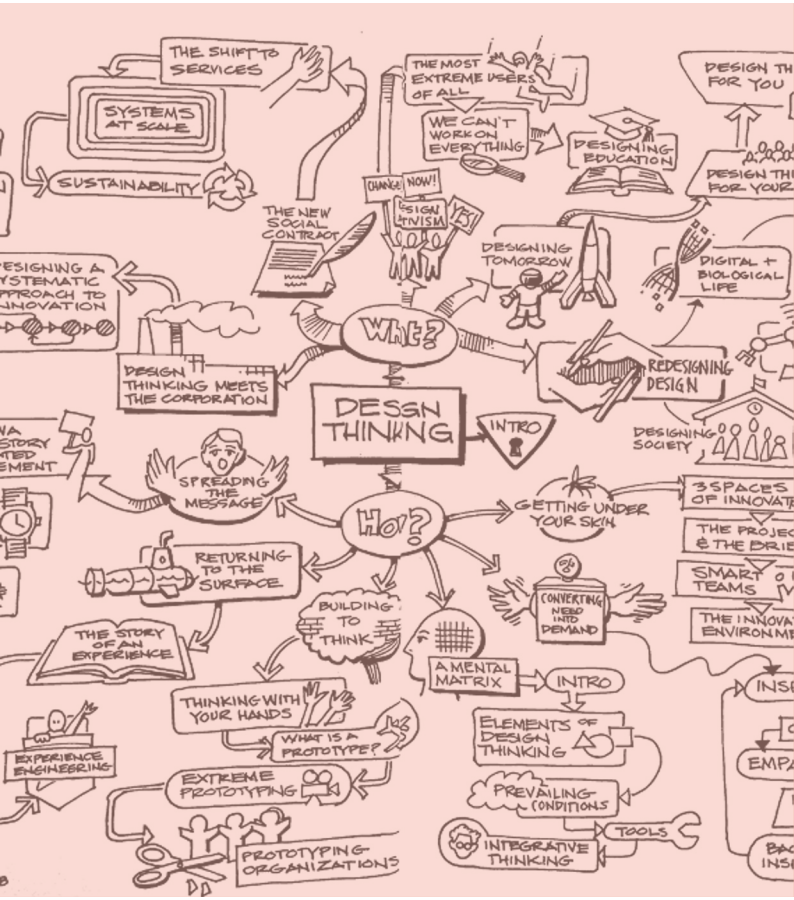

Part 4: Review (10 mins)

- Review the affinity diagram
- Do any notes need to be moved or added to create a more powerful visualisation of user needs and insights?
- Use the green (or other colour) post-it to identify any ideas or potential solutions
- Write the idea on the green post-it and place it on the affinity note, need or theme, that sparked the idea
- Take a photo of the diagram

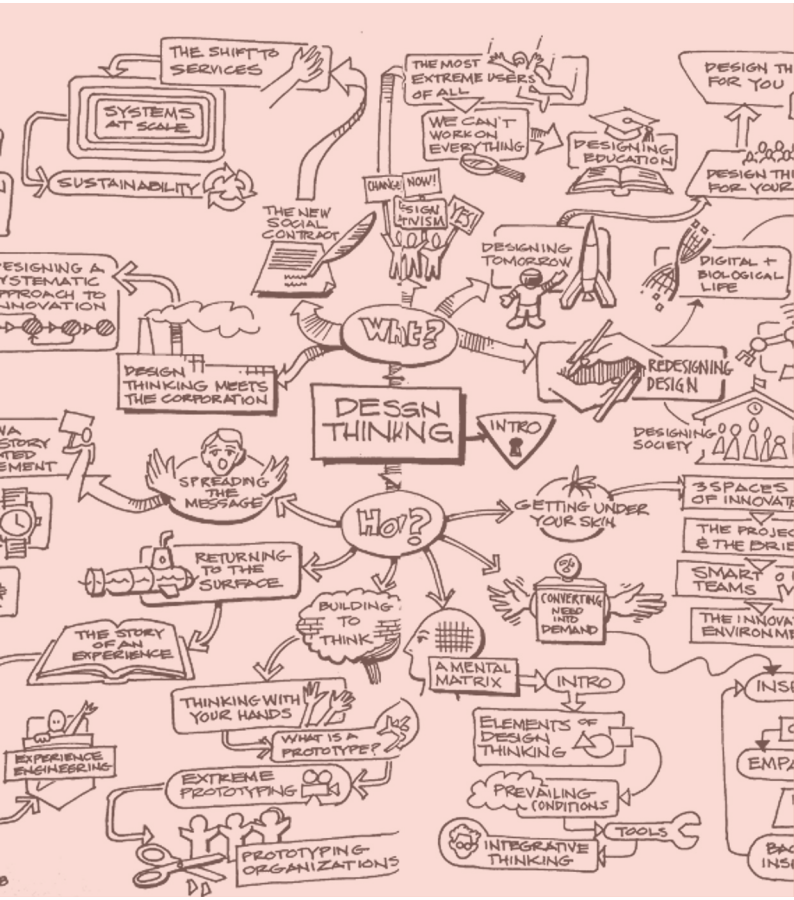

- Extracting data from transcripts – sample
- Affinity Diagrams Individual
- Affinity Diagrams Collective
- **Wrap Up**

Wrap Up

- Any unexpected insights from today's tutorial?
- Anything that's still not clear or is confusing?
- Any questions or thoughts?

Before next week

- Finalise your individual and group affinity diagrams ready for persona development
- Project groups meet to discuss data and potential opportunity spaces for the collaborative semester-long project
- Read the Week 6 module and complete the pre-work

SEE YOU NEXT WEEK!
